

Our Savior Lutheran School

At the intersection of faith and excellence is where you'll find Our Savior Lutheran School, which has served the Livermore Valley for 37 years. Our Savior is serving families of children from preschool through 8th grade, with rich and rigorous academics, integrated faith, character development, and embedded technology. Their goal is to provide an alternative to the either/or dilemma many parents face when choosing between faith-based education and traditional academics. Instead, Our Savior Lutheran School gives its students both, so they can achieve personal, academic, and spiritual excellence.

Small class sizes allow for more individualized attention, in a safe and loving environment. The *Core Knowledge Curriculum* is enriched by art, music, foreign language, and hands-on technology teaching as early as kindergarten. Collaborative efforts between classes allow students to use multiple skills in a variety of settings. Extracurricular activities include competitive athletics, student council, Latin classes, band, choir, and Lego Robotics. A one-to-one laptop program for middle schoolers and interactive SmartBoards are just two of the ways Our Savior Lutheran School is helping to inspire tomorrow's leaders today.

With chapel once a week and prayers at the beginning and end of each day, as well as before meals, students at Our Savior Lutheran School understand that they are part of a large Christian family. Yet, with such a welcoming community, they also develop a wonderful sense of self and belonging. The school is fully accredited by WASC and the National Lutheran School Accreditation and provides before and after-school care for all students.

Nestled in the natural beauty of the surrounding vineyards, Our Savior Lutheran School has a beautiful campus for children to explore. It is a place where they can learn, laugh, and grow, while practicing their faith, on the path to excellence.
