## Keep Your Promise2Pray.

KINGSVILLE, Md., May 5, 2010 — Safe-t-Technologies LLC, announces the launch of PrayerSteward, a new and unique product for iPhone and iPod Touch users. Serving as a well-organized prayer reminder, PrayerSteward's mission is to help users honor their promises to pray for others, even when the busyness of living makes remembering details a challenge. Developers have incorporated a list of flexible tools, meant to provide an easy and efficient method of recording prayer promises and sharing with others.

**PrayerSteward, also known as Promise2Pray, gives users an easy tool for logging prayer reminders.** When one person tells another that they'll pray for them, they can enter the information on the spot, so they don't forget as they go about their day. The app allows users to also add future requests and have them show up in the prayer list at the appropriate time.

**The app is designed for personal and customized usage.** Upon download, users can take advantage of the existing five different prayer categories or erase them and create their own to match prayer habits. Notes can be added and list displays can be adjusted, as well.

**Sharing non-confidential prayer requests can be done from within the app.** A user can grab information from their address books to get the contact details they need to email others in their group or circle when they want to amplify the power of their prayers for someone.

Another very useful function of PrayerSteward is the copy and paste feature, which allows users to copy all the details of a prayer request email and quickly add it to their commitment log.

#### **Some of the many features of PrayerSteward:**

- Fast and easy, even for a novice
- Set the prayer category entered most often as the default
- Add extra details, such as attaching a contact from your address book, specifying dates to pray and adding additional notes
- One tap recalls a list of all active prayer commitments
- View list of future commitments
- View list of archived commitments
- Export all or a subset of prayer commitments in a delimited text file
- Delete batches of archived commitments based on the end date of the commitments
- Localized in English and Spanish

Most importantly, PrayerSteward helps people keep their promises and puts the power of prayer networking in the hands of those who truly want to help.
